Coatings for Data Centers

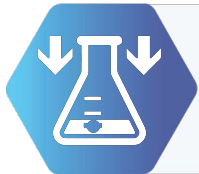

Delivering reliable, high-performance coatings which help provide long-term protection and contribute to operational efficiency.

Our coatings support essential air handling and circulation, helping to maintain adequate cooling in server rooms. Also, our durable flooring solutions are engineered to withstand the weight and movement of heavy equipment racks. Designed for longevity, these systems help minimize maintenance and downtime—meeting the always-on demands of data center environments.

Corrosion and impact protection

Our coatings help ensure that critical systems remain stable and unaffected by environmental changes, delivering the efficiency, longevity and durability required for high-security, continuous-operation environments.

Sustainable offering

Our portfolio features Low VOC (<5-50g/L) systems, helping to reduce environmental impact while maintaining high performance.

Controlled environments

Our coatings are engineered to provide excellent dust control in areas housing critical and valuable data center assets, helping to eliminate dust particles from cracks and crevices to maintain a clean environment.
