

# PPG coatings for data centers

Your trusted partner in total coatings  
solutions for data centers

As data centers continue to evolve into the backbone of the digital economy, the demand for reliable, durable, high-performance infrastructure components has never been greater. PPG stands at the forefront of innovation, delivering advanced coatings solutions engineered to protect and enhance critical data center assets.

## Coating solutions for:

**Servers and  
electrical enclosures**

**Shelving  
and racking**

**Generators**

**Transformers  
and switchgear**

**Battery energy  
storage systems**

## The PPG advantage

One of the few suppliers to  
offer products in every major  
coating technology

World-renowned technical  
services and support

Global manufacturing  
and supply chain

Sustainably-advantaged\*  
options available for key data  
center areas

50% of PPG sales are from  
sustainably advantaged\* products

100% of our key suppliers assessed  
against sustainability standards

Tough, reliable coatings for  
extreme and electrically-sensitive  
environments

Innovative technology, including  
high edge coverage and transfer  
efficiency

Wide variety of colors available

Proven portfolio of  
OEM-approved products that meet  
broad industry standards

IEEE-compliant and  
UL-recognized coatings

With decades of expertise and a commitment to innovation, PPG's total coatings solutions empower data centers to achieve maximum uptime, work with operational efficiency and meet sustainability goals.
